

City of Pleasant Ridge

2018 Cooperative Street Tree Purchase Order Form

The City is taking orders for cooperative street tree purchases until February 2, 2018.

- The cost to participate in a cooperative street tree purchase is \$125. This represents about 1/3 of the total cost to plant a street tree.
- The resident agrees to maintain and water the tree during the first 2-3 years after planting until the root system is re-established.
- The City will provide long-term pruning and maintenance.
- The type of tree that will be planted will be determined by the City's Street Tree Manual. If that type of tree is not available, an alternate species will be planted that is most similar to the species recommended by the Street Tree Manual. The resident will not be able to select the tree species.
- The cooperative street tree purchase program is only for street trees to be located between the sidewalk and the street. The City's tree contractor will not plant trees on private property under this program.
- Our tree contractor will not plant trees on private property at the City's negotiated cost.
- Trees will be planted this coming spring. The City expects to continue this program in future years.
